only

Keep your toolbox up to date with the most advanced thermal cameras on the market to gain the advantage of:

- Quickly and easily collecting and managing critical images with routing and reference imaging built into the camera using the Thermal Studio Pro software.
- Pairing your Exx or Txxx-Series camera with a FLIR FlexView dual field-of-view lens to conveniently switch from standard to telephoto imaging with the push of a button.
- Superior resolution plus FLIR UltraMax[®] and MSX[®] image enhancement, producing the most vibrant, easiest-to-interpret images.

* The offer is only valid in the EMEA region and lasts until 31st December 2025. Trade-in camera must have a minimum IR resolution of 160 x 120 px and interchangeable lenses. All devices are subject to FLIR's approval. Terms and conditions apply.
